Jelena's out today and I need to know how many square miles the Coffee Creek watershed is. Would you happen to know that by chance?

If not, I can see if Rob can find it, but I was taking a shot in the dark that you might know

8/27/21 10:03 AM
give me a sec. let me see if I have it

Russell I have that the creek is 13.9 miles but I dont think that includes the area of mossy lake, so depending on what you want you might double check with Rob

Nelson, Russell 8/27/21 10:09 AM

Thanks Juanita, it would be useful to know for sure if it includes Mossy Lake. The whole point it to ensure ADEQ adopts standards for the entirety of Coffee Creek and Mossy Lake to the confluence with the Ouachita. Thanks!!

8/27/21 10:15 AM

Russell I just checked how's my waterway for Mossy Lake and it appears to not be in our system, I'm wondering since it pulls data from attains and AR doesn't recognize it as a WoS if we have a complete picture of the watershed?

Nelson, Russell 8/27/21 10:22 AM

That's as good a guess as any as to why it's not in that database,if waters are excluded based on state standards applicability.
